Sewickley Office Renovation Completed

An extensive office remodel of the Sewickley office was completed in November 2014.

During the construction we removed two main walls optimizing our space and creating an open floor plan, as well as expanding our main conference room. We upgraded the building and décor materials, added interior windows to increase natural light, created a new kitchen space, and redesigned and upgraded the work spaces. We designed our new floor plan to improve work flow and collaboration.

OUR NEW LOOK
